

OUTSTANDING HOSPITALS DON'T SIMPLY
TREAT FRAGILITY FRACTURES — THEY PREVENT
FRACTURES FROM RECURRING

THE BEST HOSPITALS OWN THE BONE.

PREVENTION MEASURE Poor bone health often escapes detection. The National Osteoporosis Foundation recommends a bone mineral density test for patients over 50 who have fractured. Have you spoken to your patients about the benefits of a DXA? It's time to Own the Bone.

The American Orthopaedic Association and the National Osteoporosis Foundation applaud the following institutions for their participation in Own the Bone®.

Advocate Christ Medical Center
Advocate Health Care — Oak Lawn, IL
