

OUTSTANDING HOSPITALS DON'T SIMPLY
TREAT FRAGILITY FRACTURES – THEY PREVENT
FRACTURES FROM RECURRING

THE BEST HOSPITALS OWN THE BONE.

PREVENTION MEASURE Exercise, especially weight-bearing and muscle-strengthening, is one of the most effective preventative measures for the reduction of secondary fragility fractures. Have you talked to your patients about starting an exercise program? It's time to Own the Bone.

The American Orthopaedic Association and the National Osteoporosis Foundation applaud the following institutions for their participation in Own the Bone®.
